- Fix costs and get the best prices with a 2-year agreement or longer.
- We take data privacy seriously. You may view our GDPR privacy notice at [https://brookwoodacademy.org/Privacy\\_Statement](https://brookwoodacademy.org/Privacy_Statement)

### NIS Essentials for Investigators

This training provides an understanding of the general obligations of researchers when undertaking non-interventional studies.

- Personalized – the participant is addressed by their first name.
  - Users can choose between a narrated or read-only (no sound) track.
  - The training is divided into key sections, each with interactions.
  - A short test at the end of the training consolidates knowledge.
  - The course can be set up to have a pass or simply certification for completion.
  - Content is based on Good Pharmacoepidemiology requirements, Declaration of Helsinki, data protection principles.
- Topics include:**
- Definition of non-interventional
  - Types of study
  - Key factors affecting NIS
  - Ethics and consent
  - Heath authority approval
  - Data privacy
  - Protocol and its content
  - Current medical practice
  - Safety data collection
  - Study contracts
  - Data access
  - Study reports
  - Publication of results
  - Glossary of terms and abbreviations
  - Short quiz
